Description:

STEM 360• Engineering

STEM 360• is a course series that combines six different types of Engineering into this one series. Students will use all his or her creativity to design, develop, build devices and systems, getting an overview of multiple engineering disciplines. Combining other branches of the engineering, they will face the challenge from Aerospace, Robotics, Civil, Mechanical, and Manufacturing Engineering.

All Engineers use science, technology, and engineering principles to solve problems. This STEM 360• program will allow your budding engineering to face challenges from different types of Engineering and discover which one they like the best. Engineering in the future will also be the combined effort of many different types of Engineers working together to solve problems.

The little brains will face different challenges designing, building, testing and improving their experiment. Therefore, this is an excellent way to discover different types of Engineering while having fun using STEM Learning.

BrainSTEM Learning: Winter Specialists: STEM 360• Engineering (6 weeks)

(Grades 2-7, Co-Educational)

Dates: Mondays-3:15-4:45pm-MPR- Jan. 7, 14, 21, Feb. 4, 11, 25 (No classes: Jan 28, Feb. 18) - enrolled students come to the MPR after dismissal bell for a supervised snack, brain break from 3 pm-3:15 pm

Cost: \$199.99 + GST for 6 x one and a half hour sessions (9 hrs instruction) (class maximum 24 students (5% of enrollment fee going to PAC fundraiser.)

Online registration: Set up your students account and pay online at the following link:

Description:

STEM 360•: Specialists/Managers:

STEM 360• is a course series that combines six different types of Engineering into this one series. Students will use all their creativity to design, develop, build devices and systems, getting an overview of multiple engineering disciplines. Combining other branches of the engineering, they will face the challenges from Aerospace, Civil, Electrical, Mechanical, Environmental, and Chemical Engineering.

All Engineers use science, technology, and engineering principles to solve problems. This STEM 360• program will allow your budding engineer to face challenges from different types of Engineering and discover which one they like the best. Engineering in the future will also be the combined effort of many different types of Engineers working together to solve problems.

The specialist and managers will face different challenges designing, building, testing and improving their experiment. Therefore this is an excellent way to discover different types of Engineering while having fun using STEM Learning.

Online Registration:

BrainSTEM Learning has a new online registration platform called Perfect Mind. Please go to the link class link above and sign up your child's account. Please just call 604-379-2767 or email sarah.baldwin@brainstemlearning.ca with any questions or concerns about registration. If you want to sign up for selected classes, this is a custom booking which is only available through contacting myself. Online payment (credit, Electronic Fund Transfer) of the invoice is available, in-house payment of debit, cash, or cheque are also available.

BrainSTEM Learning's Cancellation Fees, Charges and Refund Policy

Cancellation Fees, Charges and Refund Policy: the parent understands no refunds are provided after two weeks before the scheduled start date of the enrolled course. Cancellations must be made two weeks before the start date of the class. Cancellations at any time will be charged a 15% plus tax administration fee. During the two-week window before the class begins, refunds will be given only for medical reasons with a doctor's certificate. By signing this form, I agree to the above rules and policies. I have read the waiver and release agreements in their entirety, as well as all the class information on the web site or in the printed information package. I understand them and agree to comply with their terms. *

BrainSTEM Learning Canada Corp. does not guarantee that there will more than one child registered in any class. BrainSTEM Learning Canada Corp. reserves the right to reschedule a class so that there are at least two students in the class. If payment has been received more than 90 days before the start date of the class, then reimbursement for cancellation will be in the form of a credit towards any future class of the parents choosing. By Submitting this form, I agree to the above rules and policies. I have read the waiver and release agreements in their entirety, as well as all the class information on the web site or in the printed information package. I understand them and agree to comply with their contents. *
